

## QUICK START GUIDE: ACCELERATED TESTING MODULE

### Access and Login

**Stab-e-lity** is accessible by web via the following hyperlink: <https://www.arlenda.com/log/> and clicking on the corresponding **Demo Version** or on the corresponding **Production Version** link.

Enter the **User ID** and **Password** in the fields provided and click on the **Login** button. If the **User ID** and **Password** combination are valid, the **Homepage** will be displayed.

Three modules are available:

- ▶ Shelf-life Computation
- ▶ Accelerated Testing
- ▶ Commercial (OOT – OOS)

Click the Accelerated Testing link, this option should be used for the downloadable **Accelerated testing** sample **Excel** data file (accelerated.xls) that is available on the **Arlenda** website (<https://www.arlenda.com/documents>). The **Project description** page is displayed.

### Step 1: Project description

The following sections will be presented:

- ▶ 1. Project description
- ▶ 2. Data introduction

#### Data introduction

Data can be entered in two ways: manually or automatically, using a pre-filled **Excel** template file (also available on the **Project description** page). We will use the latter in this guide.

Click on the **Browse** button to select the file, followed by **Upload**. This will auto-fill the data text area of the page with the data contained within the pre-filled **Excel** template file. The other fields are not completed.

Fill those with the same values as their names (i.e. enter Product Name for the **Product Name**) and select the **Time Unit** Days.

Click **Next** to advance to the **Data visualization** screen.

### Step 2: Data visualization

Two tables are presented:

- ▶ Summary
- ▶ Data

The first one contains a summary of the data entered by the user.

The second lists all the values entered by the user.

Click **Next** to advance to the **Parameters determination** screen.

### Step 3: Parameters determination

The following sections will be presented:

- ▶ 1. Statistical parameters,
- ▶ 2. Report parameters.

All the editable fields can be left at their default value.

Click **Next** to advance to the **Get report** screen.

### Step 4: Get report

#### Format and Comment-Entry

The available report format are:

- ▶ WordML
- ▶ Non-secured (eCTD) PDF
- ▶ Secured PDF

The reports can be downloaded by clicking on the icons.

Only the Secured PDF format is available in demo version.

Click on the Secured **PDF** icon to advance to the **Report customization** screen.

#### Report Download

When any comments have been introduced, click on the **Get Report** button.

The complete User Guide is available by clicking on User's Guide option in the Left-Menu.
